

CHANNEL ONE OF THE RIVER THAMES SCHEME

NOW REMOVED FROM PROJECT.

- Today the probability of flooding in Wraysbury, Horton, Datchet and Old Windsor is ever-increasing.
- The RTS flood alleviation project is progressing but without Channel One.
- In 2019 Surrey County Council agreed to contribute £230m – consequently their portion of the project (two new channels and other works) is being progressed.
- **RBWM had many years** to organise the ‘*partnership funding*’ **but in July 2020 FAILED to commit to the project.**
- Channel One was the Thames flood water by-pass from Datchet to downstream of Bell Weir. The objective was to reduce the probability of flooding in Old Windsor, Wraysbury, Datchet and Horton.
