

**The Wraysbury Drain is an ancient and significant living feature and should look like this.....**

**The watercourse is almost dry - and now looks like this due to blockages and lack of flow.**

- **This land drainage infrastructure dates back to pre-1799. The watercourse is now BLOCKED both up and down stream.**
- **In fact some land owners have FAILED TO MAINTAIN their watercourses.**
- **Furthermore RBWM has FAILED TO USE ENFORCEMENT POWERS to rectify the problem.**
